

Not that surprising.

parameter = RFT. ~~Did the~~ Not surprising that  
there was different  
results.

---

Doesn't mean there

not 5

But surely maps could be correlated.  
but don't mean anything about whether  
you exceed the threshold.

---

Don't mean that the hypothesis testing  
~~significant~~

If one team finds one useful to significant  
and another finds the misleading  
one.

don't mean the individual ~~large~~ tests are incorrect.
